Blockchain will slash Government Procurement Process time and costs

Kaspar Strandskov, Co-Founder, White Rhino

The linkage between a tradeable security and utility token addresses regulators and owners alike

Troy Norcross, Co-Founder Blockchain Rockies

Blockchain can be traded for cash or other tokens and used in a real genuine way. A game changer, a crucial step forward in the regulation of tokens and how they are issued and traded.

What do you think Matthew?

Kaspar continues, “I met Matthew 20 years ago and we built a very successful money transmittal business so with my experience in the money transmittal business and my legal background in the blockchain and cryptocurrency space we are looking to deliver, manage and maintain huge processing costs but the ability to create influential breakthrough, “ says Kaspar
