## CRYPTO & COFFEE

The global stocks surged higher yesterday despite mounting concerns that Donald Trump will seek to undermine the results when they are finalised. The president's campaign has already filed multiple lawsuits in critical swing states, including Pennsylvania and Georgia. Mr Trump has also called for a recount in Wisconsin.

Elsewhere, Bitcoin also traded higher, in part benefiting from the aforementioned controversial rhetoric by the President, but also in the wake of the news that Ethereum 2.0's deposit contract went live, which also resulted in an aggressive rally by Ethereum through the \$400 level.

The upside by Ethereum has since subsided somewhat, while Bitcoin has continued to edge higher, topping out just above \$14,500 in early European trade. It is worth pointing out that despite the ongoing grind higher, the total open interest (OI) rose only marginally yesterday. Similarly, Ethereum OI rose marginally from \$1.0bln to \$1.1bln. Signs of bullish sentiment appears to be much more evident in the options market where the skew has shifted aggressively lower, Ethereum and Bitcoin alike.

Given the aforementioned bullish development by Ethereum, it will be particularly interesting to see how the market tackles it, especially as Bitcoin continues to grind higher and the calls for the re-test of an all-time high grow louder.
